Experience

Momento + Capital

Feb 2024 – Present

Data Scientist Specialist

Mexico

- Leading a team of 3 technical specialists while driving data science and quantitative analysis initiatives.
- Designed and deployed an AI-driven solution for the business, building scalable analytics pipelines and decision-support tools using Python and aws infrastructure.

Junior Quant

Jun 2024 – Aug 2025

San Pedro Garza García, Nuevo León, Mexico

On-site

- Performed quantitative analysis for financial products using Python and MySQL.
- Built models and scripts to support trading, reporting, and portfolio monitoring.
- Assisted in the development of data-driven investment tools and dashboards.

Quant Intern

Feb 2024 – Jun 2024

San Pedro Garza García, Nuevo León, Mexico

On-site

- Supported quantitative research and data preprocessing tasks using Python.
- Assisted senior team members in model testing and validation workflows.

Monterrey Institute of Technology and Higher Education

Jan 2022 – Jul 2023

Data Analyst

Monterrey, Nuevo León

- Developed monthly KPI dashboards and reports using Python, Excel, and Google Analytics.
- Led BI projects to support academic operations and strategic planning.
- Designed automated data pipelines and centralized data storage to improve internal reporting and decision-making.

Portfolio & Projects

Banorte

March 2025 – May 2025

Data Scientist – Strategic Project (3 Months)

Mexico City

- Developed advanced statistical analyses for pension fund performance using Python and R.
- Built predictive models to evaluate retirement outcomes and long-term fund sustainability.
- Automated analytical reports and dashboards to support strategic decision-making.

■ **Academical Portfolio** This portfolio highlights my academic achievements, where I built a solid expertise in data analysis, mathematical modeling, and optical systems, demonstrating both technical proficiency and the ability to apply theory to real-world challenges.

■ **Personal Portfolio** This portfolio reflects my professional journey, showcasing my skills in data analysis, software engineering, and research. I have successfully employed a variety of programming tools to address complex issues, demonstrating my innovative problem-solving abilities and leadership in driving projects from concept to execution.

■ **Today I Learned** Is a web application designed to help users track and record their daily achievements, no matter how small. The app provides a simple and intuitive interface for users to log their personal progress, offering a space for reflection and motivation by celebrating everyday accomplishments.

■ **Recognition Face with AI** This project demonstrates a Real-Time Emotion Detection System that evaluates user emotions through a webcam feed, identifies their emotional state, and recommends car options dynamically. The system uses a Deep Learning Model, FastAPI for backend services, and a WebSocket connection for real-time updates.

Education

Monterrey Institute of Technology and Higher Education

June 2020 - June 2024

Bachelor of Science in Physics

Monterrey, Nuevo León

GPA: 3.7 (Percent Grade: 93)

Relevant Coursework: Quantum Systems, Optical Systems, Stochastic Models

International Experience in Madrid, Spain: Bachelor of Business Administration (BA)

Technical Skills

Languages: Python, JavaScript, MySQL, C++, MATLAB, AWS, HTML, CSS, Git

Technologies: AWS, Jupyter, Jupyterlab, Visual Studio Code, AI Technologies, Google Collab, PowerBI, MongoDB, Docker Hub

Concepts: Machine Learning, Neural Networks, Data Mining, Business Intelligence, Cloud Integration

Languages

English: Advanced - IELTS

Spanish: Native
